

# SQUARE FIRE PIT QUICK INSTALL TIPS

Thank you for choosing Rosetta hardscape products. The following are some helpful tips to make your first installation go smoothly. For more in-depth technical information, see our Rosetta Technical Guide (available at discoverrosetta.com) or contact Bob Conklin with Rosetta Technical Support at (877) 777-6558 ext 3081.

Your safety is important to us. Please follow OSHA guidelines, and utilize safety-toe boots, hardhats, gloves and eye, ear & respiratory protection whenever appropriate.

## **REQUIRED TOOLS**

- LEVEL
- TAPE MEASURE

#### PATIO TOP INSTALLATION

• Fire pits should never be installed atop a patio surface. Rather, the fire pit should be "cut in" to the patio surface to avoid damage to the patio.

### **BASE PREPARATION**

• Build fire pit, on level ground, as shown in the assembly detail.

## **CHECK SQUARENESS**

• After completing the first layer of block, check squareness by measuring the diagonals with a tape measure. Adjust block as necessary.

### **BLOCK PATTERN**

• Alternate block direction with each layer. Build three layers tall. Place the square liner into the completed assembly.

#### STEEL LINER ALIGNMENT

• In the completed installation, the steel liner should rest evenly on the top layer of block.
